

Gases for the  
healthcare sector

## WHAT YOU CAN EXPECT FROM US

### **Focus on understanding and meeting your requirements**

We aim to provide straightforward, cost effective and flexible services and products that meet your unique requirements as a healthcare provider.

### **Complete range of gases**

Coregas can provide all the gas requirements typically used in the healthcare industry, from industrial and specialty gases, through to medical and bulk storage products in liquid form.

### **Full compliance with drug safety requirements**

As you would expect, all our medical products conform to and are registered with the TGA as drugs, including manufacturing in accordance to the code of Good Manufacturing Practices (GMP).

### **Focus on consistent high quality**

As a company quality endorsed in accordance with AS/ANZ ISO 9001:2000, we continually strive to safely improve process and efficiencies wherever possible, without compromising quality.

### **Nationwide distribution network**

Coregas supplies healthcare providers across Australia through our extensive and growing distribution network of branches, distributors and specialised outlets.

### **Customised products capability**

Often there is a need for special multiple component gas mixtures or high and ultra-high purity gases within the healthcare industry and Coregas is a market leader in this area. Our NATA-certified laboratory provides chemical testing and product reference gases, gas mixtures and specialty gas requirements.

## WHO WE ARE

Coregas has operated in Australia since 1974, providing high quality products to the healthcare industry in the form of medical, specialty and industrial gases and equipment. Called Linde Australia until 2009, we changed name to Coregas on becoming part of the Wesfarmers group. Since then we have continued to expand and grow our product range, service offers and distribution network, both nationally and with a recent expansion into New Zealand.

# MEDICAL PRODUCTS

As our customer, Coregas will always strive to understand your requirements and work with you to find a solution that works for all parties. From standard product and delivery offers through to complete management of gas and supply, we are capable of supporting you.

## Medical gases

Coregas understand your need to satisfy the priorities of providing quality healthcare for your patients in a safe and cost effective manner.

To help you achieve this we can provide you with peace of mind with everything from product quality, support and reliable service to flexible commercial terms and easy transactional processes.

### Medical Product range:

---

Oxygen, in cylinders

---

Oxygen, in liquid form

---

Nitrous Oxide

---

Air

---

Carbon Dioxide

---

Equanox

---

Carbanox

---

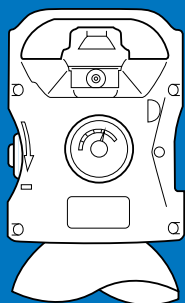

# PACKAGING

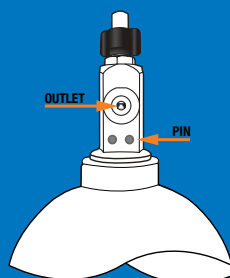

A full-page background image with a blue color cast. It shows a close-up of a person in a white lab coat looking through the eyepiece of a microscope. The person's hands are visible, adjusting the microscope. The background is blurred, showing laboratory equipment.

All cylinders, valves, liquid vessels, installations and specifications of our products comply with the relevant regulatory requirements that dictate colour and labelling through to the technical design of the packaging and outlets. Because of this legal requirement you can be sure the equipment you use will fit on Coregas cylinders.

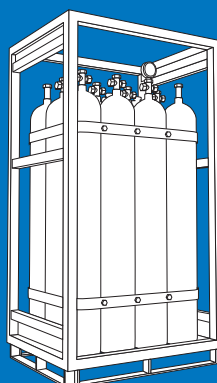

## COREGAS INTEGRATED VALVE REGULATOR

## PIN INDEX VALVE

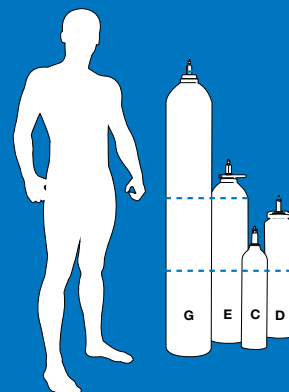

## CYLINDER PACK

## CYLINDER SIZES

Medical gas is supplied in a range of cylinder sizes

## VALVE STYLE

Pin index connection – prevents cross-connection and subsequent hazards

Medical Oxygen

Medical Nitrous Oxide

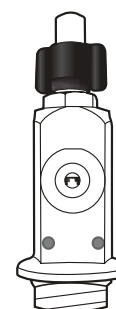

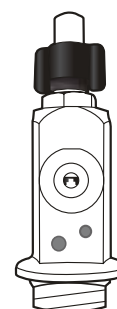

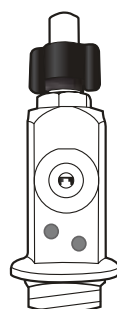

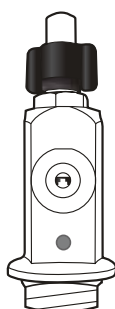

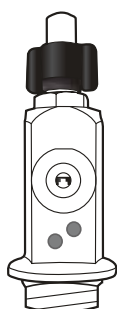

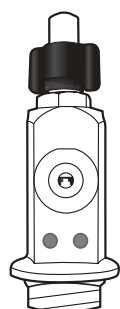

Medical Equanox  
(50% N<sub>2</sub>O, 50% O<sub>2</sub>)

Medical Air

Medical Carbanox  
(5% CO<sub>2</sub>, 95% O<sub>2</sub>)

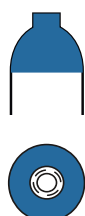

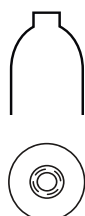

Medical Carbon Dioxide

Complies with AS2473.3

## CYLINDER BODY COLOUR

White cylinder body – differentiates medical gas cylinders from industrial gas cylinders

Complies with AS4484

# LIQUID SUPPLY AND STORAGE OPTIONS

Whatever your supply  
or storage requirements,  
we have an option to fit.

**For instance, we can:**

- custom engineer a liquid oxygen installation to provide continuous oxygen supply requirements for your hospital pipeline supply
- supply a range of liquid gases such as liquid oxygen or nitrogen for medical and laboratory use
- install a wide range of storage systems to meet your individual requirements

# SPECIALTY PRODUCTS

Coregas is a major supplier of scientific gases to the Australian healthcare industry for use in diagnosis, analysis and research in medical laboratories.

We were the first company in Australia to supply primary reference gas standards and continue to strive to be a leading manufacturer and supplier of these specialised products.

Our extensive experience and knowledge in supply of mixtures, reference gas and high purity high quality products allows you to achieve your goals.

#### **Specialty gas benefits**

- High purity and consistency
- Very comprehensive range
- NATA accreditation
- Short lead times
- Specialty gas equipment
- Technical services
- Gas management systems

# SERVICE OPTIONS

Coregas understands you do not want a 'one size fits all' offer, so we have developed a number of service options, designed to give you greater flexibility in working with us and assist you to manage costs.

## **You can choose the options that suit you best:**

### **Products**

- Complete product range to meet all your gas needs
- Range of cylinder and tank sizes

### **Ordering**

- Order via phone, fax, email or online customer account
- Reorder gases simply by scanning a barcode with our smartphone app
- Milk run

### **Invoicing and payment**

- Choice of invoice structures to best suit your requirements, eg:
  - > Standard "gas purchased and cylinders rented" invoice
  - > Pay a set fee each month and choose which services are bundled with it. Ideal for large and complex accounts with multiple transactions per month
- Pay via credit card, EFT, BPAY, cheque or cash
- Receive invoices via post, email or your online customer account

### **Cylinder management tools**

- Smartphone app to simplify managing cylinder stocks and reordering
- Completely hands-free Coregas-managed supply service, where we manage cylinder distribution around your site and cost allocation to your departments

### **Spend analysis**

- Receive information and reports to allow you to analyse your gas usage and spend
- Customer service team can assist you to understand your bills and costs

### **Ecommerce**

- EDI (electronic data interchange) system allows your organisation to communicate with Coregas electronically, improving speed and accuracy of transactions
- 'Punch out catalogue' software allows you to transact with Coregas from within your own purchasing system
- Manage your account from your desktop, tablet or mobile, whether placing orders, making payments, getting copies of invoices or checking cylinder balances

# OTHER GASES

**We know that healthcare providers often require gases other than specialty or medical.**

**Again, we can meet your requirements in these areas:**

- Industrial gases, such as those used in the Engineering, Biomedical and Maintenance departments
- Food grade and hospitality gases for catering
- Balloon gas for special occasions
