Compatible with:

Duramax Duramax Lock

Hypertherm[®]

Cartridge adapter

For the Powermax[®] torch series Duramax[®] and Duramax Lock

Upgrade to the new revolutionary Hypertherm cartridge consumable platform with the installation of a torch adapter for Powermax Duramax and Duramax Lock series torches.

Easy to use

- Hypertherm's new single-piece cartridge consumable dramatically simplifies what is needed to accomplish any cutting or gouging application.
- Installation of a torch adapter onto a Duramax or Duramax Lock torch makes conversion to the cartridge platform a simple process.
- Cartridge performance is optimized for cut quality and life and changing out cartridges is simple and efficient.

Cost effective

- The Hypertherm cartridge reduces costly mistakes caused by using the wrong consumable or not knowing which consumable needs to be changed and when.
- The torch adapter is durable for multi-use and does not require upgrading to a new torch platform.
- Consumable inventory management is streamlined and more efficient with fewer parts to purchase.

Compatibility

The torch adapter allows for conversion to the cartridge consumable platform if you have the following systems and torch types.

| System | Torch type | Adapter part number | |
|----------------|--|---------------------|--|
| Powermax45® XP | Duramax® Lock hand, mechanized and robotic | | |
| Powermax65® | | 428951 | |
| Powermax85® | Duramax hand, mechanized and robotic | 420931 | |
| Powermax105® | | | |

Not recommended for use on Duramax retrofit torches for Powermax1000/1250/1650

■ Not compatible with Duramax Hyamp[™] standard or long style torches

 The cartridge consumable platform is standard for the new Powermax SYNC[™] 65/85/105 systems with SmartSYNC[™] torches (no adapter required) The easy to identify cartridges are color coded by process to eliminate consumable part mix-ups and are clearly marked for amperage and part number. Cartridges are mixed material recyclable.

The adapter is designed to support multiple cartridge change-outs. Periodically inspect and remove the adapter from the torch to check for cracking and thread wear to determine when to replace.

The adapter adds .69" to the operational length of the torch.

When using the cartridge on a Duramax or Duramax Lock torch with the adapter, no data is transferred from the cartridge to the system for automated process setup or to provide cartridge usage data. That functionality is available for Powermax SYNC systems with SmartSYNC torch technology.*

*SmartSYNC torches are not compatible with Powermax45 XP/65/85/105 A systems

Not to scale

Drag cutting and FineCut® for hand torches
